

June–August 2026 Savings Plan

Goal: Save CAD 4,000 by the end of August 2026

Monthly assumptions: Net income is estimated at CAD 1,850/month with fixed monthly expenses of CAD 1,238.

Main Monthly Savings Plan

Month	Income	Expenses	Base Savings	Extra Needed	Total Saved
June	\$1,850	\$1,238	\$612	\$721	\$1,333
July	\$1,850	\$1,238	\$612	\$721	\$1,333
August	\$1,850	\$1,238	\$612	\$721	\$1,333

Projected total savings by end of August: CAD 3,999 (~CAD 4,000)

Side Scenario: If You Work 4 Extra Shifts per Month

At CAD 23/hour, one 7.5-hour shift earns CAD 172.50 gross. Four extra shifts = CAD 690 gross/month. Estimated net after deductions: ~CAD 540/month.

Month	Base Savings	Extra Shifts (4)	Estimated Net Added	New Total Saved
June	\$612	4 shifts	~\$540	~\$1,152
July	\$612	4 shifts	~\$540	~\$1,152
August	\$612	4 shifts	~\$540	~\$1,152

With 4 extra shifts each month, your total savings by end of August would be about CAD 3,456 from savings alone before any additional cuts or income. This lowers the gap and makes the CAD 4,000 target much easier to reach.
